

Dipterists Forum field meeting, summer 2024

Lancaster, 22 to 29 June 2024

Arrangements for collating and sharing records via iRecord

Dipterists Forum is keen that all records made during the field meeting week can be collated and made available to national recording schemes, local records centres, site managers and the NBN Atlas. To help this process we are using iRecord to bring together as many records as possible. Other options are available if you do not use iRecord.

Please follow the guidance below, and if anything is unclear contact Jane Hewitt or Martin Harvey for help. An iRecord “activity page” has been set up to display the records and provide a summary of progress that anyone can see:

https://irecord.org.uk/activities/summary?group_id=2867&implicit=f

To add records directly to iRecord

Please log on to iRecord and join the activity for the field meeting, either by searching for “Dipterists Forum” in the list of activities, or going direct to this link:

<https://irecord.org.uk/join/dipterists-forum-field-meeting-lancaster-summer-2024>

Once you have joined, you can add records using the link in the activity that says “Enter a list of records”. You can also use the iRecord app, but in that case you will need to link your app to the activity – if you don’t know how to do this see the iRecord Help page:

irecord.org.uk/help/irecord-app-activity

If you do not use iRecord

Please send in any records from the field meeting (for all species groups) on a spreadsheet to Jane Hewitt, who will compile them and (with your permission) upload them to iRecord. If needed, a template for a suitable spreadsheet can be supplied by Jane or Martin.

Dos and don’ts!

- Please do send your records in one way or the other!
- Please add your records to iRecord or send us a spreadsheet, but don’t do both!
- Please don’t copy your records direct to the recording schemes or records centres unless you have to, so as to avoid duplication. (Schemes and centres are able to access the records from iRecord.)
- If you are a recording scheme organiser, and receive a spreadsheet of records from the field meeting, please do not upload them to iRecord yourself, but pass them on to Jane to be checked against other records.

This document and the activity summary can also be seen on the DF website field meetings page:
